

# Products for an Impressive Exterior

*Vinyl Fence and Railing Systems*

# The Difference is Virgin Vinyl

Sixth Avenue Building Products uses 100% virgin vinyl in the production of our fencing and railing systems. This produces a more durable, waterproof, and dimensionally stable product than recycled vinyl, which contains reprocessed fillers and various materials known as “re-grind.”

Your product is manufactured with the end user in mind, from its superior structural integrity to the strictest quality control over both materials and the manufacturing process. Sixth Avenue products create the appearance of wood with the practicality of vinyl.

- UV resistant, colorfast and durable in all climates, arid or tropical
- Will not delaminate, or crack, peel, swell, rot, or splinter like wood
- Lightweight, yet built to last 20+ years with multi-layered extrusion technology
- Easy installation
- Wind resistance for the fence panels, Belfast LBP8601, LBP8701, and LBP8615 (46-55 mph) and Wexford LBP8651, LBP8751, and LBP8851 (68-72 mph)
- Structural integrity requiring minimal need for inserts in railings
- Low-maintenance, wipe clean material

An accomplished, skilled research and development team stands behind Sixth Avenue Building Products. For more information, visit [www.BodoPlasticsUSA.com](http://www.BodoPlasticsUSA.com).

# Belfast Privacy Fence Panel — White

## 6'H x 6'W White — Model No. LBP8601

- Assembly Required
- Post, Post Cap and Brackets Sold Separately

7/16" x 2" x 8' – Model No. LBPGS01

# Trim Boards

## Trim Boards — White Profile

**PVC White Trim Board**  
3/4" x 4" x 8' – Model No. LBPTB01

**PVC White Trim Board**  
3/4" x 6" x 8' – Model No. LBPTB02

**PVC White Trim Board**  
3/4" x 8" x 8' – Model No. LBPTB03

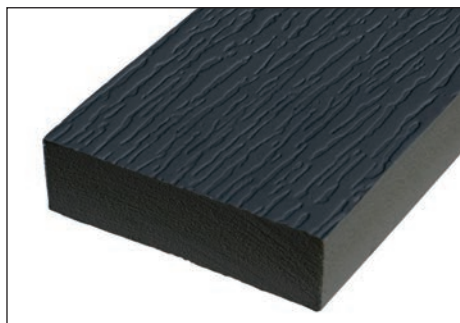

## Trim Boards — Black Profile

**PVC Black Trim Board**  
3/4" x 4" x 8' – Model No. LBPTB04

**PVC Black Trim Board**  
3/4" x 6" x 8' – Model No. LBPTB05

**PVC Black Trim Board**  
3/4" x 8" x 8' – Model No. LBPTB06

# Project Planning Guidelines

- Prior to construction, check with your local regulatory agency for local code requirements.
- Contact your utility company to locate and mark underground lines.
- Draw the layout of your fence and calculate the number of panels, gates, posts and caps needed for your project.
- If you must use a partial panel, place in the furthest corner of the property.
- Careful planning and measurement of your fence project is essential, as moving posts after the concrete sets is extremely difficult.
- Measure and assemble your gates first to determine the width of the gate opening (including space for hardware). Be sure to allow enough clearance on the bottom of the gate to allow it to swing freely.
- When installing your fence or gate, we recommend installing 1 post and section at a time.
- We recommend allowing a minimum 2" clearance between the bottom of the panel and the ground.

For complete installation instructions for Sixth Avenue Building Products fencing and railing systems, visit [www.BodoPlasticsUSA.com](http://www.BodoPlasticsUSA.com).
